BACKGROUND:

Due to the current local and national conditions related to the COVID-19 pandemic, the Jacksonville Aviation Authority (JAA) is currently temperature screening all JAA employees. Certain employees are assigned to shifts for screening duty, which requires that they manually take employee temperatures on various shifts and record that the temperature screening has been completed. As passenger volume begins to increase, these employees are needed for their normal duties and, therefore, automating the temperature screening process is in JAA's best interest.

Additionally, JAA utilizes a CCure 9000 access control system and a Victor video surveillance system. Compatibility with these systems is a primary concern. Johnson Controls has released an automated temperature screening solution that is an "end point" on these systems, maximizing integration and leveraging current support mechanisms. As such, this award represents a sole source purchase pursuant to § 3.09 of JAA's Procurement Code.

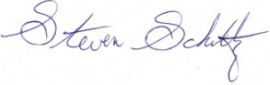

RECOMMENDATION:

Information Technology recommends a properly noticed sole source award be made to Johnson Controls, Inc., for automated temperature screening and related accessories and integrations, in an amount of \$53,539.00, plus an additional 5% or \$2,677.00 for unforeseen circumstances that may arise during installation, for a total not-to-exceed award amount of \$56,216.00.
